NATIONAL TRANSPARENCY AUTHORITY

**ANNUAL
REPORT**

2019

GOVERNOR'S MESSAGE

The establishment of the National Transparency Authority (hereinafter referred as NTA or Authority) with the Law 4622/2019, constituted the catalyst for a radical organizational and operational modernization of key public Audit Bodies (Inspectors-Controllers Body for Public Administration, General Inspector of Public Administration, Inspectors Body for Health and Welfare Services, Inspectors Body for Public Works, Inspectors-Controllers Body for Transport), as well as the General Secretariat of Anti-Corruption.

The Governor of
the NTA

Within the first four months of its operation, the Authority managed to successfully implement a very demanding management plan for change by completing the integration of the six bodies and the addressing organizational and operational dysfunctions of years. At the same time, there was not a day of operational inactivity. From the very beginning, the Authority exercised all its responsibilities thanks to the experience and tireless efforts of the staff and the management team. Statistical data show that the Authority has produced measurable and high-quality work in all three of its operations pillars, Control - Prevention - Awareness, and managed to create strong links with society and high expectations for continuity.

In 2019, we laid the foundations for a series of reform actions involving structural changes, such as the standardization and modernization of audit procedures and methodologies based on international standards and good practices, adopted by the most successful public bodies active in preventing and combating fraud and corruption and improving the effectiveness of administrative action.

NTA also developed a strong presence at international level, demonstrating that Greece can embrace innovation, bring forth the talent of public administration executives, implement ambitious reforms and mobilize forces of the public and private sectors. Citizens demand accountability for the actions of public bodies and institutions. They recognize transparency as a pillar for improving their daily lives. They need to see that things are changing in the field of public integrity and the fight against corruption. NTA was founded to respond to citizens' expectations and change the situation.

Not everything that we achieved in 2019 would have been possible without the professionalism and dedication of the executives of NTA. In 2020, we are committed to work even harder and together move towards accomplishing the goals that unite us all. More transparency. Less corruption. Social justice and equal opportunities for all.

INTRODUCTION

The annual report of the National Transparency Authority provided for in article 85, par. 5 of Law 4622/2019 (Government Gazette 133/A'/07.08.2019), is the main tool of transparency and accountability for the Authority's action and aims to provide objective and responsible information on the work carried out and for the planning of its activities for the following year.

The report is submitted by the Governor of the Authority to the President of the Greek Parliament and to the Committee on Institutions and Transparency, to be discussed in accordance with the Standing Orders of the Parliament. It is also posted on the website of the Authority.

The introductory section of the annual report for 2019 presents a summary of the report for year 2019 with emphasis on the most important results. The main part of the report is structured in the following thematic sections:

1. Legal nature, institutional framework and organizational structure of the Authority.
2. Organizational change actions that took place during the first period of operation of the NTA, with emphasis on the key points of the Action Plan developed to manage the transition to a single Organization, following the abolition of five Audit Services and a General Secretariat, as well as the simultaneous transfer of their responsibilities and staff to the Authority.
3. An overview of the activities of the NTA within the four months of its operation, based on the following three operational axes:
 - a) Auditing work of the Authority and good practices of members of the former Coordinating Body of Inspection and Audit
 - b) Integrity and Accountability Promotion
 - c) Actions on awareness and information
4. Presentation of the international partnerships developed by NTA, as well as the portfolio of projects that have been designed and implemented, taking advantage of the opportunities offered by different financial tools and European programs.
5. A summary of the strategic vision of the NTA that emerges through its upgraded institutional role and annual operational planning, in which the main operational pillars and key lines of intervention are highlighted. In addition, the structural actions designed to be undertaken by the NTA in 2020 are presented.

This document lists the introductory section of the Authority's report with the summary of the 2019 report.

The entire annual report (Greek version) has been posted on the official website of NTA (www.aead.gr) at the link:
